Electrocoating

A Guidebook for Finishers

Published by *THE ELECTROCOAT ASSOCIATION*

About the Book

While numerous options for finishing products exist today, electrocoating offers many environmental and economic advantages that make it the environomic solution for metal finishers. This guidebook, developed in cooperation with many electrocoating and general finishing industry experts, is intended to serve as a comprehensive reference for finishers using electrocoating technology.

Each chapter is written with the end-user in mind. It is the first publication to provide an in-depth "walk-through" of an entire electrocoating operation, outlining all the components and subject areas of an electrocoating system.

This format, along with illustrations, a glossary, a comprehensive index, and troubleshooting guide, assists the reader's understanding of electrocoat materials to match their needs.

Contents

Chapter One—Pretreatment

Chapter Two—Paint

Chapter Three—Electrocoat Equipment and Process

Chapter Four—Water Conditioning

Chapter Five—Curing Ovens

Chapter Six—Material Handling

Chapter Seven—Environmental Considerations

Chapter Eight—Economics of Electrocoat

Chapter Nine—Quality and Testing for Electrocoat Paint Finishes

Chapter Ten—Troubleshooting for Electrocoating

Glossary of Electrocoating Terms

Index

About THE ELECTROCOAT ASSOCIATION

THE ELECTROCOAT ASSOCIATION is a non-profit trade association founded in 1997 to promote the environmental and economic benefits of electrocoat technology. Members include manufacturers and suppliers of equipment, chemicals, paint, ancillary equipment, custom coaters, captive shops and other individuals interested in this finishing process.
